CONSERVATION PROJEKT

Xiphophorus - Northern Platyfish

CLUB/ORGANIZATION

Poecilia Nederland

CAPACITY

Coordinator of the Xiphophorus protection group, which is getting founded

VIVARISTIC EXPERIENCE

Date (from)

[geographical area, family](#)

Cichlids From before 2003 I have kept cichlids from Central America, and have bred quite a few species. I have also been moderator of a Dutch cichlid forum for some 15 years. Life bearers I kept since 2010 or so I also keep life bearers, both Poecilids and Goodids. I have held 3 lectures for Poecilia Nederland

[breeding success](#)

Several Xiphophorus species and Goodeids

Motive force

I like Xiphophorus, but I don't care much about color. I've kept and enjoyed X andersi for instance for years, enjoying them much more than the colored varieties of platyfish. My latest talk for Poecilia Nederland was about why keeping large quantities of fishes, exchange males in order to keep the aquarium population healthy. I would like to help keeping platyfish existing, both for the fishes and to learn the system – also in order to help keeping other species in captivity for a long time.
